

Monthly Performance Report (MPR)

Name: Habibullah

Department: IT

Month: June 2026

Duty Timing: 10:00 AM – 8:00 PM

1. Core Development & Project Work

A) IVS Inventory Management System Development

Module 1: Landing Page & Login

- Designed IVS Inventory landing page with system branding.
- Created secure login page with clean UI.

Module 2: Dashboard

- Added dashboard cards for devices, employees, and assignments.
- Added quick actions and recent activity sections.

Module 3: Device Management

- Created Add Device and Device List pages.
- Added search, filters, history, edit, delete, and trash.

Module 4: Employee Management

- Created employee list and Add Employee form.
- Added search, filters, assigned devices, deactivate, and delete.

Module 5: Assignment & Return

- Created device assignment flow for employees.
- Added return process with automatic availability update.

Module 6: Reports & Audit

- Created Search & Reports page with filters.
- Added CSV/PDF export and device history tracking.

Module 7: User Roles & Permissions

- Created user roles for Admin, Manager, and Viewer.
- Added module-wise permission checklist.

Module 8: Profile & Backup

- Created profile update and password change options.
 - Added daily, weekly, and monthly backup downloads.
-

B) IVS Fee Calculator Improvements

- Improved PDF generation speed.
 - Optimized Supabase and Google Sheet data synchronization.
 - Fixed calculator data disappearing while switching browser tabs.
 - Created CSR accounts and credentials in Supabase.
 - Improved calculator stability and overall performance.
-

2. Technical Support & Infrastructure

A) CSR System Support

- Researched Sonar Voice Cancellation software for CSR teams.
- Installed and tested Sonar with different headsets.
- Installed VirtualBox, Windows 7, and VOIP software on CSR systems.
- Resolved Windows and VOIP-related technical issues.

B) Domain Management

- Transferred the **darulqurra.edu.pk** domain from PKNIC to Namecheap.
- Configured the domain and verified the hosting setup.

3. LMS Coordination & Training

- Conducted Zoom meeting with coordinators and teachers.
 - Prepared presentation slides for LMS introduction.
 - Explained Courses, Assignments, Quizzes, and Announcements.
 - Guided teachers on practical LMS usage.
 - Collected feedback and improvement suggestions.
 - Coordinated with the academic team during LMS implementation.
-

4. Testing & Quality Assurance

- Tested all Inventory Management System modules.
 - Verified dashboard, devices, employees, assignments, reports, and backups.
 - Fixed bugs and improved UI/UX across the system.
 - Optimized workflows for better performance and stability.
-

5. Monthly Summary

During **June 2026**, my primary focus was the design and development of the **IVS Inventory Management System**. I successfully completed major modules including Dashboard, Device Management, Employee Management, Assignments, Returns, Reports, User Management, Profile, and Backup System. In addition, I enhanced the IVS Fee Calculator, provided CSR technical support, managed domain migration, conducted LMS training sessions, and performed extensive system testing and bug fixing to ensure a stable and user-friendly application.
